#### visualization inte

#### interpretation

ramifications"

"People generate data: every search query we perform, link we click, movie we watch, book we read, picture we take, message we send, and place we go contribute to the massive digital footprint we

[Think also of historical source documents]

each generate"

"Not all data generated is collected, perhaps out of choice because we do not need or want to, or for practical reasons.... Deciding what to collect defines a filter on the data we generate"

"everything from data cleaning, data wrangling, and data formatting to data compression, for efficient storage, and data encryption, for secure storage"

"We are careful to store our data in ways both to optimize expected access patterns and to provide as much generality as possible. We need to create and use different kinds of meta data for these dimensions of heterogeneity to maximize our ability to access and modify the data for subsequent analysis"

"all the computational and statistical techniques for analyzing data for some *purpose: the* algorithms and methods that underlie artificial intelligence (AI), data mining, machine learning, and statistical inference, be they to gain knowledge or insights, build classifiers and predictors, or

infer causality"

"helps present "we provide the results in a clear human reader an explanation of and simple way that a human what the picture can readily means. We tell a understand and story explaining visualize" the picture's context, point, implications, and possible

Jeannette M. Wing (2019) "The Data Life Cycle" Harvard Data Science Review

## Lessons for big data

neration collection	processing	storage	management	analysis	visualization	interpretation
itaset bias Informed	PII exposure &	Data	Access & reuse	Algorithm/	Honest	Explainability
Deon C.2) consent ( <u>Deon</u>	anonymity	security &	( <u>DEDA 10– 11</u> )	machine bias	representation	( <u>Deon D.4</u> ; <u>DEDA1</u> )
ta quality  Deda 3-4)  Collection bias	( <u>Deon A.3;</u> <u>DEDA 5, 19–21;</u> <u>DHR</u> )	breaches ( <u>Deon B.1,</u> <u>DHR</u> )	Data retention plan ( <u>Deon B.3</u> )	( <u>DHR</u> )  Honest representation	( <u>Deon C.3; DEDA</u> <u>9</u> )  Embodiment &	Communication bias ( <u>Deon D.5</u> )
cumenting ( <u>Deon A.2</u> )	Discrimination	Right to be	Compliance	( <u>Deon C.3</u> )	affect ( <u>FDV 3.5</u> )	Consider contexts (FDV 3.4)
Sources DEDA 2)  Metric selection (Deon D.3; DEDA26)  Binaries (FDV 3.1)	through proxy variables ( <u>Deon</u> <u>D.1</u> )  Algorithm/ machine bias ( <u>DHR</u> )	forgotten ( <u>Deon B.2</u> )  Encryption ( <u>DEDA 6</u> )	(DEDA13,22)  Responsibility (DEDA 14,17)  Rollback possible? (Deon E.2)  Labor & power	Privacy in analysis ( <u>Deon</u> <u>C.4</u> )  Auditability ( <u>Deon C.5</u> )		Future implications (DEDA 27)
_	F <u>DV</u>		TD T T	$\frac{EDV}{DED}$ (Deon E.2)	$\frac{(Deon \ E.2)}{(Deon \ C.5)}$ $Labor \ \& \ power$	$\frac{(Deon \ E.2)}{(Deon \ C.5)}$ $Labor \ \& \ power$

#### use/deployment

Fairness across groups / Discrimination (<u>Deon D.2</u>; <u>DEDA 15</u>; <u>DHR</u>)

Targeting, manipulation, injury(<u>DHR</u>)

*Unintended uses* (<u>Deon E.4</u>; <u>DEDA 12</u>)

#### throughout

Missing perspectives (<u>Deon C.1</u>; <u>DEDA 25</u>; <u>FDV 3.2 & 3.3</u>)

Concept drift (<u>Deon E.3</u>) Awareness of bias (<u>DEDA 23–24</u>)

Transparency (<u>DEDA 18</u>) Redress (<u>Deon E.1</u>; <u>DHR</u>)
